CIVIL 93-2527 (CCC)

9 v.

10 PUERTO RICO ELECTRIC POWER
11 AUTHORITY,

12 Defendant
13 _____

14 OPINION AND ORDER

15
16 On October 27, 1993, the United States filed a complaint against PREPA pursuant
17 to several environment statutes and regulations, including the air quality and emission
18 limitation requirements of the Clean Air Act, 42 U.S.C. §§ 7401-7431; the effluent
19 limitations and National Pollutant Discharge Elimination System requirements of sections
20 301 and 402 of the Federal Water Pollution Control Act (Clean Water Act), 33 U.S.C. §§
21 1311-1342; the oil pollution prevention requirements promulgated at 40 C.F.R. pt. 110
22 pursuant to section 311 of Clean Water Act, 33 U.S.C. § 1321; the inventory requirements
23 for hazardous chemicals pursuant to section 312 of the Emergency Planning and
24
25
26

CIVIL 93-2527 (CCC)

2

1
2
3 Community-Right-to-Know Act (EPCRA), 42 U.S.C. § 11022; the hazardous substance
4 release reporting requirements promulgated at 40 C.F.R. pt. 302 pursuant to section 103
5 of the Comprehensive Environmental Response, Compensation, and Liability Act
6 (CERCLA), 42 U.S.C. § 9603; the hazardous substance release reporting requirements of
7 section 302 of EPCRA, 42 U.S.C. § 11004; and the underground storage tank requirements
8 promulgated at 40 C.F.R. pt. 280 pursuant to section 9003 of the Resource Conservation
9 and Recovery Act (RCRA), 42 U.S.C. § 6991b.
10
11

12 On March 15, 1999, after years of negotiation, the court entered a Consent Decree
13 resolving the United States' claims against PREPA, while allowing PREPA to avoid any
14 admission of liability. The expressed purpose of the parties in entering into such an
15 agreement was to promote PREPA's compliance with and to "further the goals and
16 objectives of the Clean Air Act, Clean Water Act, RCRA, CERCLA, and EPCRA, and the
17 regulations promulgated to implement each of those statutes."¹ This Decree established
18 the payment of civil penalties and provided for the implementation of various
19 environmental projects by PREPA, in addition to including comprehensive injunctive
20 provisions under the various environmental statutes mentioned above.
21
22

23 In its preamble, the Decree specifically states that the parties agreed that it had been
24 negotiated "in good faith," that its implementation would "avoid prolonged and
25

26 ¹Consent Decree at 13, ¶ 36.

CIVIL 93-2527 (CCC)

3

1
2
3 complicated litigation,” and that both parties deemed it “fair, reasonable, and in the public
4 interest.”² The document further states that the parties agreed that the resolution of the
5 United States’ claims against PREPA through the entry and the enforcement of the
6 Consent Decree and all of its stipulations was “in the best interest of the Parties and the
7 public.”³ Moreover, PREPA there agreed that it would bear responsibility for ensuring the
8 performance of any requirements stipulated by the parties and included within the Consent
9 Decree, in accordance with their final negotiations as memorialized therein, and that it
10 “shall not challenge the terms of this Consent Decree or this Court’s jurisdiction to enter
11 and enforce this Consent Decree.”⁴
12
13

14 There exist, however, certain specified provisions through which EPA and PREPA
15 may, at any time, pursuant to the prescribed scheme stipulated in Section XXIII
16 (“Modification”), at page 155,⁵ negotiate modifications to the agreed upon requirements
17 of the Consent Decree, provided that such comply with the Decree’s expressed objectives.
18
19

20 ²Consent Decree at 2.

21 ³Consent Decree at 3.

22 ⁴Consent Decree at 11, ¶ 30.

23 ⁵Section XXIII (“Modifications”), at 155-156, ¶ 131, reads in part:

24 [The] EPA and PREPA may, by written agreement, without approval of the Court, modify
25 the proposal, workplans, or statements of work submitted pursuant to the Decree and its
26 attachments.

CIVIL 93-2527 (CCC)

4

1
2
3 Additionally, and in case of disagreement(s) “arising under or with respect to” the Consent
4 Decree, the parties included therein Section XV (“Dispute Resolution”), at page 138,⁶
5 specifying the procedure they must engage in to resolve disputes.
6

7 The dispute here in question centers on the proper manner to perform Visible
8 Emission (VE) readings, also known as “opacity” readings, using the EPA’s Reference
9 Method 9, 40 C.F.R. pt. 60, app. A, Meth. 9, as required by the Consent Decree.
10

I. THE FACTS

11

12 During the week of January 25, 1999, EPA inspectors carried out multimedia
13 inspections at the four power generating plants owned and operated by PREPA—Palo Seco,
14 San Juan, Aguirre, and South Coast—, to ensure PREPA’s compliance with the PRSIP
15

16 ⁶Section XV (“Dispute Resolution”), at 138-141, ¶¶ 95-100, reads:

17 Unless otherwise expressly provided for in this Consent Decree, including any
18 Attachments or Appendices to this Consent Decree, the dispute resolution procedure of this
19 Section shall be the exclusive mechanism to resolve disputes arising under or with respect to
20 this Consent Decree. However, the procedure set forth in this Section shall not apply to
21 actions by the United States to enforce obligations of PREPA that have not been disputed in
22 accordance with this Section.

23 Any dispute that arises under or with respect to this Consent Decree or any of its
24 Attachments or Appendices shall, in the first instance, be the subject of informal negotiations
25 between the Parties to the dispute. The dispute shall be considered to have arisen when one
26 Party receives from the other Party a written Notice of Dispute. The period for informal
negotiations shall conclude upon receipt of written notice from either Party but shall not
exceed thirty (30) days from the date of the Notice of Dispute unless such time period is
extended by written agreement of the Parties to the dispute.

In the event that the Parties cannot resolve a dispute by informal negotiations under the
preceding paragraph, then the written position advanced by EPA shall be considered binding
unless PREPA invokes the formal dispute resolution procedures of this Section by filing with
the Court a petition describing the nature of the dispute, describing the efforts made by the
Parties to resolve the dispute.

CIVIL 93-2527 (CCC)

5

1
2
3 (Puerto Rico State Implementation Program) and with the requirements of the proposed
4 Consent Decree.⁷ During these visits, EPA inspectors conducted their own visible
5 emissions (VE) opacity readings and reviewed the VE report sheets completed by PREPA's
6 Method 9 trained readers. On these occasions, EPA first learned, through discussions with
7 plant personnel, about PREPA's erroneous procedure for VE readings, which its agents had
8 been directed by PREPA to perform at "about one stack diameter above the top of the
9 stack."
10

11
12 PREPA alleges it based its "one stack diameter" standard on certain correspondence
13 between the two agencies. In a letter from PREPA's Mr. Asbel Escribano, dated
14 October 29, 1997, Mr. Escribano wrote: "The acid mist formation is not at the stack exit,
15 it is detached. It is formed at a distance equivalent to 1 stack diameter away from the
16 stack. There is no visible steam condensation at the stack exit." Based on this information
17 provided to EPA by PREPA, Mr. Thomas Logan, a Senior Environmental Engineer in EPA's
18 Office of Air Quality Planning and Standards, advised PREPA, in a letter dated
19 November 3, 1997, as follows: "As you stated for your particular case, if you do not believe
20 that there is any steam condensation present, I would read the opacity at the most dense
21 portion of the plume at one stack diameter." In another letter dated July 12, 1999, as soon
22
23
24

25 ⁷On January 25, 1999, the Consent Decree had already been filed although not yet entered
26 by the Court. It was finally entered on March 19, 1999 (Docket No. 142).

CIVIL 93-2527 (CCC)

6

1
2
3 as the present controversy became apparent to Mr. Logan, he clearly expressed to PREPA
4 that his former recommendation had been based on their allegations and that the turning
5 point of compliance with Method 9 was observation of the plume "at the greatest point of
6 opacity".
7

8 Thus, although PREPA argues that this "one stack diameter" measure was approved
9 and advised by EPA, the linchpin of PREPA's supporting argument originated with PREPA
10 itself, based on PREPA's misleading and over-generalizing description of its situation to
11 EPA. The accurate manner of conducting Method 9 inspections requires, however, that
12 "[o]pacity observations shall be made at the point of greatest opacity in that portion of the
13 plume where condensed water vapor is not present." 40 C.F.R. pt. 60, app. A, Meth.9, §
14 2.3. From the scant documentation PREPA had submitted to EPA, EPA was unable to find
15 a connection between PREPA's "one stack diameter" standard and Method 9's "point of
16 greatest opacity." *A fortiori*, PREPA's VE observations are not Method 9 readings.
17
18

19 On January 25, 1999, during their visit to the Palo Seco power plant, EPA inspectors
20 in fact pointed this out to Mr. Elí Matos, PREPA's Environmental Affairs Legal Director,
21 who agreed to look into these matters and to make the necessary changes. In its February,
22 1999 Inspection Report, EPA informed PREPA of PREPA's erroneous Method 9 readings
23 and of the suspicion this casts over both PREPA's establishment of its Optimal Operating
24
25
26

CIVIL 93-2527 (CCC)

7

1
2
3 Ranges (OORs) and over PREPA's reports of compliance with both the PRSIP and the
4 Consent Decree.

5 EPA attempted to resolve this issue with PREPA through numerous phone calls and
6 meetings, prior to, and in an attempt to avoid resorting to, invoking the Consent Decree's
7 Dispute Resolution's (Section XV) paragraph 96⁸ by the issuance of a Notice of Dispute.
8 During these discussions, PREPA stated that it had conducted an internal review of its
9 Method 9 compliance program, for which it had contracted with an independent consulting
10 firm. PREPA alleged that this review supported its position that their opacity observations
11 were in compliance with Method 9. However, no studies, reports, or any other
12 documentation was submitted to the EPA verifying such compliance.
13
14
15

16 Unable to resolve this issue through informal consultations, or to even engage in any
17 substantive communications with PREPA, and in view of PREPA's continuous cancellation
18 of scheduled meetings, on August 23, 1999,⁹ and pursuant to the Consent Decree,
19

20

⁸Section XV ("Dispute Resolution"), at 139, ¶ 96, reads:

21 Any dispute that arises under or with respect to this Consent Decree or any of its
22 Attachments or Appendices shall, in the first instance, be the subject of informal negotiations
23 between the Parties to the dispute. The dispute shall be considered to have arisen when one
24 Party receives from the other Party a written Notice of Dispute. The period for informal
negotiations shall conclude upon receipt of written notice from either Party but shall not
exceed thirty (30) days from the date of the Notice of Dispute unless such time period is
extended by written agreement of the Parties to the dispute.

25 ⁹Exhibit 5, August 23, 1999, Letter from EPA to PREPA.
26

CIVIL 93-2527 (CCC)

8

1
2
3 paragraph 96, EPA sent PREPA a Notice of Dispute, which triggered a 30-day period for
4 informal negotiations. EPA tried to accommodate PREPA's apparent scheduling difficulties
5 by extending the informal negotiations period a number of times, but it subsequently
6 became "obvious" to EPA that further delays by PREPA would be inevitable.
7

8 Throughout this process, on at least six different occasions,¹⁰ EPA requested from
9 PREPA the contracted studies and supporting documentation of PREPA's alleged
10 compliance with Method 9 procedures. After PREPA repeatedly promised and failed to
11 send EPA these documents, on October 29, 1999, during a phone conversation between
12 attorneys for EPA and PREPA, PREPA's counsel responded that it would not provide such,
13 due to concerns over confidentiality. Since PREPA had not yet engaged in, and was likely
14 to keep avoiding, any substantive discussion of the issues, on November 5, 1999, pursuant

1
2
3 to paragraph 97 of the Consent Decree,¹¹ EPA issued a Notice of Dispute concerning
4 PREPA's misinterpretation of Method 9.

5 II. THE LAW

6
7 Judicial review of EPA's actions pursuant to the stipulations of the Consent Decree
8 negotiated by the United States Environmental Protection Agency and the Puerto Rico
9 Electric Power Authority and entered by this court in March, 1999, and the pertinent
10 statutes and regulations which it was designed to promote, is governed by provisions set
11 forth within the Consent Decree and by the provisions of the Administrative Procedure Act
12 (APA), 5 U.S.C. §§ 701-706. See Adams v. United States EPA, 38 F.3d 43, 49 (1st Cir.
13 1994). Under the APA, the applicable standard of review is whether the EPA's actions are
14 "arbitrary, capricious, an abuse of discretion, or otherwise not in accordance with law." 5
15 U.S.C. § 706(2)(A). See Puerto Rico Aqueduct & Sewer Auth. v. United States EPA, 35
16
17
18

19 ¹¹Section XV ("Dispute Resolution"), at 139, ¶ 97, reads:

20 In the event that the Parties cannot resolve a dispute by informal negotiations under the
21 preceding paragraph, then the written position advanced by EPA shall be considered binding
22 unless PREPA invokes the formal dispute resolution procedures of this Section by filing with
23 the Court a petition describing the nature of the dispute, describing the efforts made by the
24 Parties to resolve the dispute, and proposing a resolution of the dispute, including, but not
25 limited to, the relief requested and any schedule pursuant to which the dispute must be
26 resolved to ensure orderly implementation of the Consent Decree. Any such petition shall be
filed within fifteen (15) days from the date of conclusion of the informal negotiation period
as set forth in the preceding paragraph. In any such dispute, PREPA shall bear the burden of
proof. No inferences or presumptions adverse to either Party will be drawn as a result of the
termination of informal negotiations or the invocation of formal dispute resolution
procedures. The United States shall have forty-five (45) days to respond to the petition.

CIVIL 93-2527 (CCC)

10

1
2
3 F.3d 600, 604 (1st Cir. 1994); Puerto Rico Sun Oil Co. v. United States EPA, 8 F.3d 73,
4 77 (1st Cir. 1993). A court should not set aside agency actions as arbitrary and capricious
5 unless the actions lack a rational basis, as when an agency's actions lack a reasoned
6 explanation, inexplicably depart from standard policies, are based on discriminatory
7 practices, or are based on considerations Congress did not intend to make relevant. See
8 Caribbean Petroleum Corp. v. United States EPA, 28 F.3d 232, 234 (1st Cir. 1994); Wong
9 Wing Hang v. INS, 360 F.2d 715, 718 (2nd Cir. 1976); United States ex rel. Kaloudis v.
10 Shaughnessy, 180 F.2d 489, 491 (2nd Cir. 1950).

13 The scope of review under the "arbitrary and capricious" standard is thus a narrow
14 one, and the court should not substitute its judgment for that of the agency. Caribbean
15 Petroleum Corp. v. United States EPA, 28 F.3d at 234. (quoting Motor Vehicles Mfrs.
16 Ass'n v. State Farm Mut. Auto Ins., Co., 463 U.S. 29, 43 (1983)). Courts should defer to
17 an agency's interpretation of a statute that it is charged with enforcing. The court's
18 deference increases when the agency is interpreting statutes and regulations which have
19 been entrusted to its administration. Adams v. United States EPA, 38 F.3d at 49. See
20 generally Chevron U.S.A., Inc. v. Natural Resources Defense Council, Inc., 467 U.S. 837,
21 842-43 (1984); Shell Oil Co. v. EPA, 950 F.2d 741, 747 (D.C. Cir. 1991) (per curiam).
22 As long as an agency stays within congressional delegation, it is within its power to make
23 policy choices when interpreting a statute, and such choices and interpretations are also
24
25
26

CIVIL 93-2527 (CCC)

11

1
2
3 entitled to deference. Arent v. Shalala, 70 F.3d 610, 615 (D.C. Cir. 1995). Moreover, an
4 agency is entitled to an extra measure of deference with regard to factual questions
5 involving technical and scientific matters in its own area of expertise. Pan Am. Grain Mfg.
6 Co. v. United States EPA, 95 F.3d 101 (1st Cir. 1996); Adams v. United States EPA, 38
7 F.3d at 49; Puerto Rico Aqueduct & Sewer Auth. v. United States EPA, 35 F.3d at 604.

9 Finally, in reviewing an agency's action, courts will not consider issues which the
10 petitioner failed to present during the administrative process in accordance with the
11 relevant procedural requirements. Adams v. United States EPA, 38 F.3d at 50. Respect
12 for an administrative agency's role requires that the court ensures that challenges to an
13 agency's interpretation of its governing statutes are first raised in the administrative forum.
14 Linemaster Switch Corp. v. EPA, 938 F.2d 1299, 1308-09 (D.C. Cir. 1991); see also
15 National Resources Defense Council, Inc. v. United States EPA, 25 F.3d 1063, 1074 (D.C.
16 Cir. 1994). Cf. Kelly v. United States EPA, 203 F.3d 519, 521 (7th Cir. 2000) (stating that
17 the court would not set aside an agency's decision to penalize violations unless there is no
18 substantial evidence in the record, taken as a whole, to support its findings, and that failure
19 to develop arguments during administrative proceedings may result in waiver of such). In
20 Massachusetts Dep't of Public Welfare v. Secretary of Agriculture, the court expounded on
21 the imperative of this doctrine of procedural default in the administrative context. Adams
22 v. United States EPA, 38 F.3d at 50 (quoting Massachusetts Dep't of Public Welfare v.

CIVIL 93-2527 (CCC)

12

1
2
3 Secretary of Agriculture, 984 F.2d 514, 524 (1st Cir.), cert. denied, 510 U.S. 822 (1993)).

4 The Supreme Court stated that when an administrative agency is allowed an opportunity
5 to address a party's objections, it can apply its expertise on the field in question, exercise
6 its informed discretion, solidifying the agency's autonomy and creating a "finely tuned
7 record" for the event of judicial review. Additionally, it espoused this doctrine on the basis
8 of judicial economy, so that interested parties will not simply turn to the courts as a
9 "tribunal of first resort." Id.

10 11 12 III. THE ANALYSIS

13 Pursuant to the Consent Decree, PREPA bears the burden of proof for all disputes
14 arising from the Consent Decree.¹² EPA's basic scientific determinations regarding the
15 dispute are as follows. PREPA's stacks emit generally white-colored plumes, which the EPA
16 has found are neither detached steam plumes, nor condensed water plumes, but are rather
17 composed of sulfuric acid at "significant concentrations."¹³ The point at which maximum
18 opacity typically occurs for this type of plumes is a few stacks diameters downwind of the
19 stack, since it takes a certain amount of time for the sulfuric acid mist to reach maximum
20 condensation. This is then the proper point at which to take all Method 9 VE readings of
21

22
23
24 ¹²Consent Decree at 140, ¶ 97: "In any [dispute arising under or with respect to the
25 Consent Decree], PREPA shall bear the burden of proof."

26 ¹³Exhibit 6, November 5, 1999, Letter from EPA to PREPA.

CIVIL 93-2527 (CCC)

13

1
2
3 PREPA's sulfuric acid mist plumes, including those taken to establish the Optimal
4 Operating Ranges (OORs) pursuant to the Consent Decree. VE readings taken at any other
5 location, but the most opaque point in the plume are inaccurate, and thus any OORs
6 established relying on such readings do not comply with the stipulations agreed upon by
7 the parties in the Consent Decree. I thus find that PREPA in its selection of the point at
8 which to observe opacity of emissions from its Generating Units, has not acted in
9 compliance with Method 9. I agree with EPA's recommendation that PREPA revise its
10 interpretation of Method 9 VE readings to abide by the proper procedure and that, based
11 upon this correction, it also revise its OORs to comply with the terms of the Consent
12 Decree.
13
14

15
16 EPA's positions regarding this dispute also include the following. PREPA should not
17 be permitted to turn the court into a forum for presenting materials that should have been
18 provided to EPA during the informal, "dispute resolution," administrative proceedings.¹⁴
19 PREPA did not avail itself of the procedures set up by the Consent Decree, but instead has
20 obstructed EPA's efforts to informally resolve the dispute by withholding information. If
21 true, PREPA's information concerning its purported compliance with the Consent Decree
22

23 ¹⁴Consent Decree at 34, ¶ 21a, reads thus:

24 PREPA shall organize, compile, retain, and make available to EPA upon request, all
25 documentation generated in connection with activities conducted pursuant to paragraph F
26 of Section V of the Consent Decree ["Determination In The Case Of Noncompliance"]. Such
documentation shall include, but shall not be limited to, record of all data, observations, and
results of testing generated by any Oversight Contractor.

CIVIL 93-2527 (CCC)

14

1
2
3 and with the goals and objectives of the Clean Air Act, Clean Water Act, RCRA, CERCLA,
4 and EPCRA, and the regulations promulgated to implement each of those statutes would
5 have greatly narrowed, or eliminated, the issues now before the court.

6
7 PREPA contests EPA's determination that it failed to properly conduct VE readings
8 and thus to properly establish Optimal Operating Ranges and to comply with both the
9 PRSIP and the Consent Decree. PREPA argues that its oil-fired generating units produce
10 emissions which include sulfur compounds and condensed water vapor (steam). PREPA
11 alleges that "at the point of greatest opacity" the visible plumes emitted by its oil-fired
12 generating units contain both sulfuric acid mist and steam, and that this steam presence
13 disallows the use of Method 9 for visually determining the opacity of emissions. EPA's
14 experts who have frequently observed the visible emission plumes emanating from the
15 PREPA stacks, however, have determined that PREPA's most common visible emission
16 plumes are sulfuric acid mist plumes, not steam. Reports prepared by PREPA's own
17 contractor, Radian Corporation, and previously submitted to EPA, further confirm EPA's
18 findings. Moreover, EPA's experts have established that there is no need for observers to
19 deviate from Method 9 requirements, because PREPA's oil-fired units in fact normally emit
20 no condensed water vapors. PREPA further characterizes as unfounded and precipitous
21 EPA's determination that PREPA is a "recurring, egregious, or persistent" violator of Rule
22 403 of the Regulations for the Control of Atmospheric Pollution of the Commonwealth of
23
24
25
26

CIVIL 93-2527 (CCC)

15

1

3 Puerto Rico ("Rule 403") with respect to Generating Units 5 and 6 of PREPA's South
4 Coast Facility. Petition of Puerto Rico Electric Power Authority for Dispute Resolution,
5 February 28, 2000, at 1, ¶ 2, Docket No. 167.

6
7 IV. CONCLUSION

8 I find that the EPA's actions under the Consent Decree are not "arbitrary, capricious,
9 an abuse of discretion, or otherwise not in accordance with law." EPA has been able to
10 present rational, reasoned explanations, supported by scientific facts, for its claims against
11 PREPA. It has not in so doing departed from standard or based its actions on
12 discriminatory considerations or on reasons otherwise unintended by Congress. Thus,
13 there is no reason for the court to vacate the agency's determinations. This is especially so
14 since the statutes upon which the Consent Decree was based have been entrusted to EPA
15 by Congress for their administration, and since the matters surrounding this controversy
16 are highly technical and scientific and within EPA's particular area of expertise. EPA has
17 thus acted within its scope of authority pursuant to congressional delegation and under the
18 terms of the Consent requirements. The Clean Air Act, for instance, imposes upon EPA
19 a nondiscretionary duty to issue a notice of violation once it finds noncompliance with the
20 SIP requirements. 42 U.S.C. §§ 7410(a)(2)(B), (c), (c)(5)(B), 7413(a)(1). Furthermore,
21 once a Notice of Violation has been issued, EPA's decision to proceed further is
22
23
24
25
26

CIVIL 93-2527 (CCC)

16

discretionary, and it is not subject to review. New England Legal Found. v. Costle, 475 F. Supp. 425, 433 (D. Conn. 1979), aff'd, 666 F.2d 30 (2nd Cir. 1981).

Therefore, PREPA's requests for dispute resolution, (Docket Nos. 162, 167), scheduling order and hearing (Docket No. 168) are DENIED. The motion requesting order to notify CUCOO of any motion or document filed is GRANTED. (Docket No. 163.)

SO ORDERED.

In San Juan, Puerto Rico, this 19th day of June, 2000.
